

CARLOS JIMENEZ LOPEZ

Software Engineer

(661) 978-4861 | cjimenez9811@gmail.com | Long Beach, CA | <https://github.com/carlos-lopez98>

CAREER SUMMARY

Aspiring software engineer with experience as a Test Automation Engineer, where I've learned to disrupt and improve systems. Successfully transitioned from a supply chain career, leading teams and automating workflows through technical solutions. Now specializing in Java and Spring Boot development.

EXPERTISE

- **Back End Development:** Strong experience building and maintaining efficient backend systems using Java Programming Language. Experience working with various Java Frameworks like Spring Boot delivering through the full software development lifecycle.
- **Front End Development:** Proficient in using HTML and CSS. Exposure to React.js for building user interfaces and server-side component rendering using PHP.
- **Programming Languages:** Proficient in Java with experience using Spring Boot, Selenium, and MyBatis.
- **Database Management:** Skilled in SQL, MySQL, and RDBMS systems. Knowledge of cloud databases, including AWS RDS, AWS S3, and AWS DynamoDB.
- **RESTful Services:** Experienced in developing and integrating RESTful web services using Spring Boot.
- **Testing:** Exposure to Junit and Mockito for unit and integration testing. Experience using test-driven development principles to create integration tests.
- **Version Control Systems:** Proficient with Git and GitHub. Experience using AWS CodePipeline for CI/CD.
- **Agile and Teamwork:** Experience working with cross-functional teams, code reviews, mentorship, and adopting methodologies such as Agile, Scrum, and Waterfall.
- **Supplemental Experience:** Proficient in conducting peer reviews for multiple programming languages, including Kotlin, Java, PHP, Swift, Objective C, and Python.

PROFESSIONAL EXPERIENCE

TEST AUTOMATION ENGINEER | Meta (via Solvd Inc.) | Walnut Creek, CA

July 2024 – February 2025

As a Test Automation Engineer at Meta, my role focused on ensuring compliance with FTC orders by conducting in-depth peer reviews across Java, PHP, React, Kotlin, Swift, and Objective-C. I reviewed an average of 8-15 daily code submissions, auditing documentation, data pipelines, and databases to maintain a 100% FTC-compliant code base. Additionally, I contributed to the validation of in-house automation frameworks by manually testing automated review results, ensuring accuracy in compliance enforcement and streamlining the audit process.

- Maintained 100% accuracy across thousands of compliance reviews, identifying engineering errors before FTC audits, ensuring flawless regulatory adherence.
- Approved automation for five compliance categories by manually validating 500+ tests against manual reviews. This led to the complete elimination of manual reviews for the five compliance categories.

TEST AUTOMATION ENGINEER INTERN | Solvd Inc. | Walnut Creek, CA

April 2023 – November 2023

As a Test Automation Engineering Intern at Solvd, my role focused on developing Selenium-based automated tests for web and mobile applications, ensuring functionality across various views and validating API responses. I strengthened my Java expertise through real-world projects, implementing Object-Oriented Design principles and utilizing tools like MyBatis, JDBC, and SQL databases to build transactional systems. Additionally, I actively participated in code reviews, debugging sessions, and algorithm-based assignments, reinforcing both technical and problem-solving skills in a collaborative environment.

PROJECTS

CRIME WATCHERS | <https://github.com/carlos-lopez98/CrimeWatchers>

Lead the development of a Neighborhood app clone. The product was designed to be scalable and integrate seamlessly with law enforcement agencies. Engaged in full lifecycle development, including requirement gathering, user interface design, feature implementation, backend architecture, and unit/ integration testing. Contributed to documentation, code reviews, and team sessions for continuous development through daily standup meetings.

- Tech Stack: Java, Spring Boot, AWS CodePipeline, AWS Lambda, AWS DynamoDB, Redis, Junit, Mockito, Git

E-GROCERIES | <https://github.com/carlos-lopez98/E-Groceries>

Participated in the development of an inventory management system. The system featured customer login, stock management for employees, and exporting tools for analysis. Enabled admins to update stock levels and oversee product inventory.

- Tech Stack: Java, Spring Boot, JavaScript, HTML, CSS, AWS CodePipeline, AWS Lambda, AWS DynamoDB, Redis, Junit, Mockito, Git

EDUCATION

BACHELOR'S DEGREE Software Engineering Western Governors University	2023 – 2025
CERTIFICATE DIPLOMA Software Engineering – Backend Focused Southern New Hampshire University	2022 – 2023
ASSOCIATE'S DEGREE Natural Science Cerritos College	2017 – 2020

ADDITIONAL PROFESSIONAL EXPERIENCE

Successfully pivoted from a career in Supply Chain and Logistics, after accumulating 6+ years of experience. I developed a deep understanding of operational efficiency, cross-functional collaboration, and automation. In roles at Biocair, Griley Air Freight, and Port X Logistics, I led teams, optimized workflows using tools like Excel VBA and Google App Scripts, and managed complex client projects. I gained hands-on experience in data analysis, process improvement, and automation, driving significant increases in efficiency and accuracy. This background, combined with leadership in fast-paced environments, has equipped me with the skills to excel in application development, where I continue to leverage my technical and problem-solving expertise.

KEY ACCOUNTS LOGISTICS SPECIALIST Biocair Carson, CA	May 2024 – July 2024
CELL AND GENE THERAPY LOGISTICS SPECIALIST Biocair Carson, CA	April 2023 – May 2024
LOGISTICS SPECIALIST Griley Air Freight Hawthorne, CA	February 2022 – March 2023
SUPPLY CHAIN COORDINATOR Port X Logistics Long Beach, CA	September 2021 – November 2022
DISPATCH OPERATIONS REPRESENTATIVE Apex Logistics Compton, CA	February 2020 – September 2021
